Powering A Connected World With Global-Local Expertise

Global Network Capability

Beside the in-depth network in China, CITIC Telecom CPC also has a Global high-quality network that allows companies to connect their ICT infrastructure (ie, in China and in CIS) legally into their global network. Part of the global network is a direct terrestrial connection across regions, such as between Europe and the Greater China.

CITIC Telecom CPC Advantage

Global Footprint, Local Support, Integrated ICT Solutions

The diagram above shows the European network

CITIC Telecom CPC is an expert to deliver ICT services across the globe, including Europe & CIS, US, Africa, APAC and the Greater China.

To service our customer locally, we have NOCs and CSCs located in Europe and Asia, ensuring smooth support in the same time zone. These operational centres can be the single point of contact for all ICT services delivered globally, including the underlay connectivity, both private and public (internet).

Local Professional team always helps to overcome the local billing, legal, language, and cultural barrier.

Global-Local ICT Services

ICT services become more critical due to digital transformation resulting in an inherent change in the ICT infrastructures. CITIC Telecom CPC not only operates a local MAN in Tallinn, allowing to provide competitive local services in Estonia, but also offers comprehensive world-class Managed Services and Innovative ICT solutions across the globe, such as multi-cloud services, SD-WAN, and SASE to address today's business operation.
