

TrueCONNECT™ Premium

Best-in-class Connectivity for Fast-paced Distributed Business

TrueCONNECT™ Premium is a managed private network service using MPLS (Multi Protocol Label Switching) to connect offices and sites at different locations with different Classes-of-Service (CoS), it is ideal for modern enterprises operating with distributed points of presence globally. TrueCONNECT™ Premium's fully meshed private network topology offers Guaranteed Quality-of-Service (QoS) to ensure excellent performance and reliability for all mission-critical enterprise applications, including transmission of voice, video and data. It is a superb choice as a cost-effective alternative to IPLC and other Layer 2 private networks without compromising performance or security.

FLEXIBLE OPTIONS

- **Extensive Coverage:** CITIC Telecom CPC has extensive network coverage. Our global footprint spans more than 160 countries and over 160 points of presence, and is further extended to other countries through interconnections with top-tier global carriers.
- **Multiple Office Locations:** Our global points of presence are staffed with experienced professionals who can assist your local office personnel in their native languages. Our staff are fully versed in the in-country business and regulatory environments, with world-class technical expertise.
- **Simplify Network Management:** As a fully managed solution, TrueCONNECT™ Premium delivers the enterprise connectivity, without the complexity, cost and risk of managing your own infrastructure. As your business expand and evolves, we can help you to easily reconfigure network topology so your staff can focus on core business goals.
- **24x7 Monitoring & Support:** We provide non-stop around-the-clock monitoring and support for all our flagship solutions, including TrueCONNECT™ Premium. If we detect any issues with your network, we will proactively alert you and follow up with status reports, until the issues are resolved.

KEY FEATURES

Optimized for Business

TrueCONNECT™ Premium is optimized to deliver best-in-class features, performance and security for your business-oriented network, delivering a highly agile, fully managed connectivity service that is ready to support your digital transformation. Unleash the full potential of your mission-critical applications with the networking power of TrueCONNECT™ Premium.

Created for the Cloud and More

Featuring seamless cloud-network integration and the ability to leverage innovative technologies, such as SD-WAN, SASE, IoT, and AI, TrueCONNECT™ Premium smoothly supports the cloud platforms your enterprise needs, including Direct Cloud connections, Hybrid WAN deployments, and other networking topologies.

Highly Available, Highly Secure

With best-in-class network resiliency, TrueCONNECT™ Premium provides the reliability you need for the peace of mind to focus on your business. The multi-link core network delivers fast-rerouting in the event of any POP-to-POP core network link failure, and alternate links will automatically handle the full traffic load to maintain connectivity. TrueCONNECT™ Premium offers guaranteed uptime, dynamic bandwidth scalability, and the protection of secure private connections. Traffic is fully separated at the MPLS network layer, along with other security measures, to safeguard your enterprise communications and digital assets.

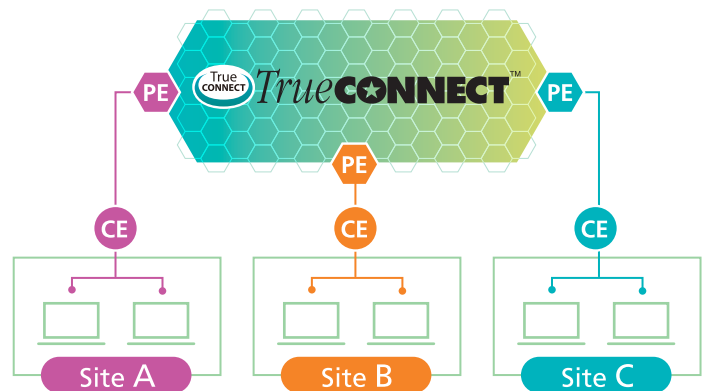

TrueCONNECT™ Premium Network Diagram

An ideal private network solution to connect multiple locations while converge voice, video, and data onto a secure single IP-based network platform.
