

Recover your Mission Critical Data, just within Minutes!

Business data is the lifblood of every enterprise and you wouldn't want any data loss due to disaster events, security attacks, human errors or service downtime. However, some recent researches showed that the total volume of data loss at the enterprise level has grown more than 400% in the past few years and about 43% of SMB never recover from extensive data loss.

CITIC Telecom CPC's SmartCLOUD™ BRR, a virtualized backup, replication and recovery service, acts as your effective Disaster Recovery (DR) plan that offers down to minute-level recovery time and minimizes the service downtime.

Virtualized Backup, Replication & Recovery with 100% Reliability

Certified with ISO9001, ISO14001, ISO20000, ISO27001 & ISO27017

Simple charging model based on number of replicating VM & storage

24x7 proactive monitoring, alerting & incidents remediation

Fully customized backup & replication schedule, and retention policy

Automated failover, failback and DR testing with the push of a button

Support second-level RPO and minute-level RTO
