

Smart**CLOUD**™ Compute

Virtual Private Cloud Solution

High-Performance Cloud Resources At Your Total Command

Time-to-market and high strategic agility are key success factors in today's fast-paced business environment. With rapid development in the IT sector over the last few years, cloud computing becomes highly relevant when considering new business opportunities and technology possibilities - a way to increase capacity, or add capabilities on the fly, without investing in new infrastructure, training new personnel, or licensing new software. Cloud computing encompasses any subscription-based or pay-per-use service that, in real-time over the Internet, extends existing IT capabilities.

CITIC Telecom CPC's SmartCLOUD™ Compute, a revolutionary virtual private cloud solution that goes beyond ordinary offerings to deliver best-in-class high-performance and high-availability with unprecedented value and management ease, which can dynamically boost your business efficiency, competitiveness and agility. Now you can securely scale out without barriers.

HIGHLIGHTS

- A flexible total solution consists of CPU, memory, storage, network and port, plus optional advanced networking empowered by VMware NSX
- Virtual machine can be customized to almost any size to tailor for unique business needs
- Advanced networking (software-defined) enables fast provisioning, flexible and unified networking to enhance service availability, scalability and agility
- Self-service cloud management portal for resource management with 2-factor authentication
- Fully compatible DR solution designed for SmartCLOUD™ Compute
- Interoperation with CITIC Telecom CPC's private network solutions and managed security services to facilitate the deployment of cloud systems

Your Global Local ICT Solutions Partner

High Availability (HA) with True Disaster Recovery (DR) Safeguards

BUILD YOUR BUSINESS WITH CONFIDENCE. CITIC Telecom CPC SmartCLOUD™ cloud computing solutions which can complement the company's managed private network and managed security solutions. On SmartCLOUD™ Compute, robust High Availability and true Disaster Recovery give you perfect peace-of-mind. Automated in-site failover (across even disparate hardware) can instantly restore services, network assets and storage access, minimizing business operations disruption. Even in a hybrid environment, business can still enjoy the load balancing and high availability features of the solution.

For added reliability, CITIC Telecom CPC offers SmartCLOUD™ Compute High Availability solution that leverages tandem SmartCLOUD™ Compute deployments to achieve true fault tolerance.

Flexible choices of STORAGE: Storage

Storage SSD

- Ultra-high performance, low latency all-flash array
- Optimized performance storage resources designed for the IOPS sensitive applications, such as database, ERP and trading system
- To cater different applications environments, IOPs can be dynamically allocated to different VMs.

For example, within the subscribed Storage SSD resource pool

Up to 50,000 IOPS & 200 Mbps throughput can be shared among VMs.

Storage Hybrid

- Cost-effective mixed disk array running on hard disks with SSD cache
- Designed for a wide variety of resources loading

Flexible SUBSCRIPTION models:

Flat-rate

- Fixed monthly subscription for customers whose applications consume computing resources consistently
- Suitable for steady usage and customers who prefer fixed monthly billing

Burstable

- Allow resource burst from subscribed resources; usage-based charge for bursty resources consumption
- Suitable for varying usage or steady usage with occasional burst requirement, such as seasonal campaigns or ad-hoc projects which require fast resources provisioning

Pay-As-You-Go (PAYG)

- With limited resources reservation fee, the charge is based on the actual usage
- Suitable for unpredictable usage which requires maximum flexibility and minimum commitment

5 key components run with Software-defined Advanced Networking to facilitate smooth and efficient operation
