

SmartCLOUD™ DaaS Desktop-as-a-Service

Click and Play Desktops and Applications Solution

In the age of the mobile workforce, businesses must enable team members to work anywhere, anytime, on any device. Yet cost and efficiency pressure mean tight IT budgets and challenging performance targets, while fast-paced and constantly evolving business needs demand reliable infrastructure, rapid deployment, temporary contractors, and round-the-clock global support. Virtual Desktops solve many of these challenges, but operating self-owned equipment is costly. The perfect solution is **SmartCLOUD™ DaaS**, a cloud-based Desktop-as-a-Service offering that runs on CITIC Telecom CPC's world-class infrastructure to empower your mobile workforce with low TCO, high security, and maximum flexible features.

HIGHLIGHTS

- Enables workforce to access their virtual desktops and applications from desktop PCs, laptops, web browsers, thin/zero clients, tablets and mobile phones
- Robust Disaster Recovery (DR) capabilities ensure Business Continuity, and easy and rapid failover for SmartCLOUD™ DaaS platform
- Flexible and cost-efficient monthly subscription minimizes expenses in hardware, operating systems, software applications, and ongoing IT administration and upgrades
- Access virtual desktops via multimedia-optimized and secure PCoIP protocol, as well as other industry standard RDP, Blast and NX protocols
- Easily integrated with existing enterprise IT environment, with MS Active Directory-based or LDAP-based user access to virtual Windows desktops and applications
- User-friendly centralized management portal facilitates IT administrators to manage desktop images, applications, multiple desktop models and non-persistent desktops

Your Global Local ICT Solutions Partner

The perfect solution for desktop virtualization

Unprecedented End-user Experience

Office users and on-the-road mobile staff can easily and seamlessly access their desktops and applications status anywhere, anytime, via the cloud, on any device (including tablets, smartphones, laptops, desktop PCs, thin and zero clients), which are customized to their unique needs or workload requirements. Staff can finally handle oversized files at ease.

Strong Security and Ease of Control

Central control portal provides user-friendly management console for IT administrators to monitor, configure and deploy cloud-hosted desktops and applications, with the same security credentials, policies and permissions as the existing policy and infrastructure. CITIC Telecom CPC further provides optional 2-factor authentication and dedicated TrustCSI™ UTM for superior data and application security.

Dedicated Bandwidth Access

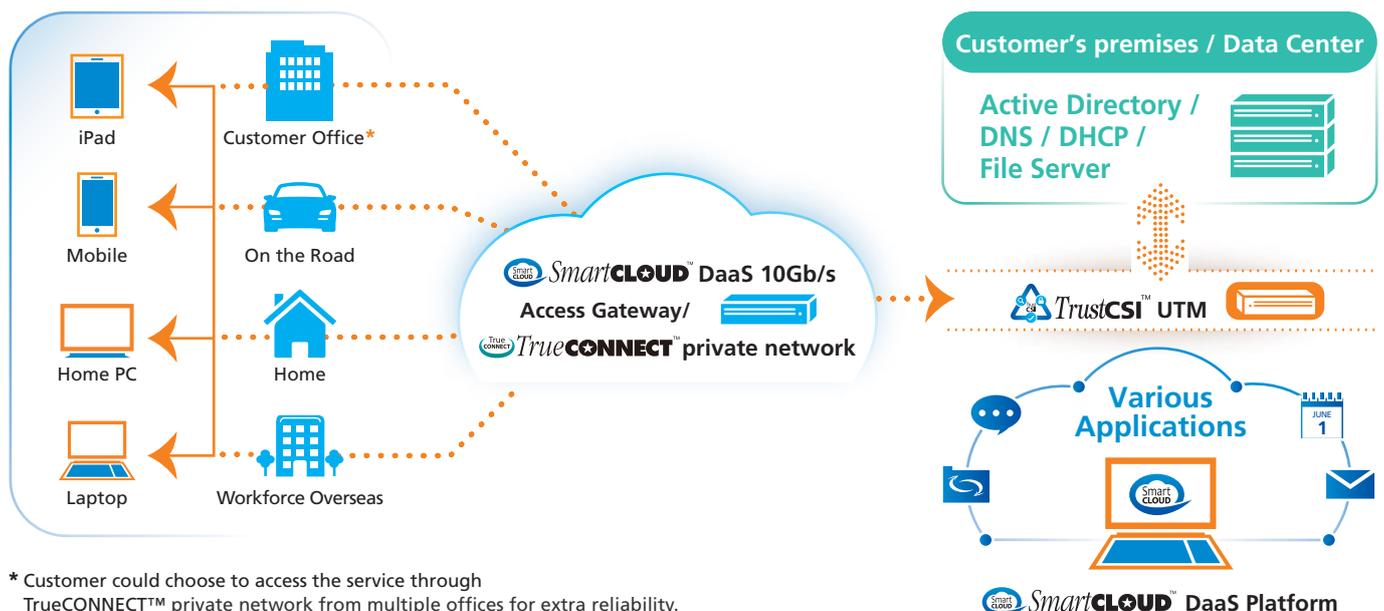

SmartCLOUD™ DaaS comes with dedicated 10Gb/s access gateway, providing fast and reliable access anywhere, and ensuring minimum latency and excellent user experience.

Business Continuity and Confidence

Users can gain peace of mind through CITIC Telecom CPC's comprehensive portfolio of server-side or end-user network security, onsite and offsite backup and Disaster Recovery solutions (such as SmartCLOUD™ BRR and SmartCLOUD™ EPS), all vigilantly protecting corporate data and ensuring business continuity 24x7x365 with best-of-class security and redundancy measures.

SmartCLOUD™ DaaS delivers secure remote access of desktops and applications to any device, anywhere with premium end-user experience and minimum latency.

* Customer could choose to access the service through TrueCONNECT™ private network from multiple offices for extra reliability.
