Secure Remote Work Solution

Since the sudden outbreak of the coronavirus many offices have closed. Organizations are taking swift measure to protect the well-being of employees by rolling out work-from-home initiatives.

With current scenario we can help you with scaling up your remote user capability in a secure, fast and effective way. Our TrueCONNECT™ Remote & Express helps you to overcome all your network connectivity challenges fast (using existing Cloud infrastructure and Virtual Network Functions (VNF)), customized and backed up with 24/7 support. Our solution can be implemented over the existing public Internet connections at your home workers location. Also for the connection from the Secure Central Gateway to your existing network we use existing Internet connections (and existing equipment where possible) ensuring on-time guaranteed delivery with minimum or none engineer on-site involvement. We leverage our private backbone to deliver low latency cross-region connections for instance from EU/Russia to Asia.

To ensure your business continuity as your ICT partner we would like to offer you our TrueCONNECT™ Remote & TrueCONNECT™ Express (Network-based private network service) services.

Register now! Up to 2-Months free trial
