FOR IMMEDIATE RELEASE

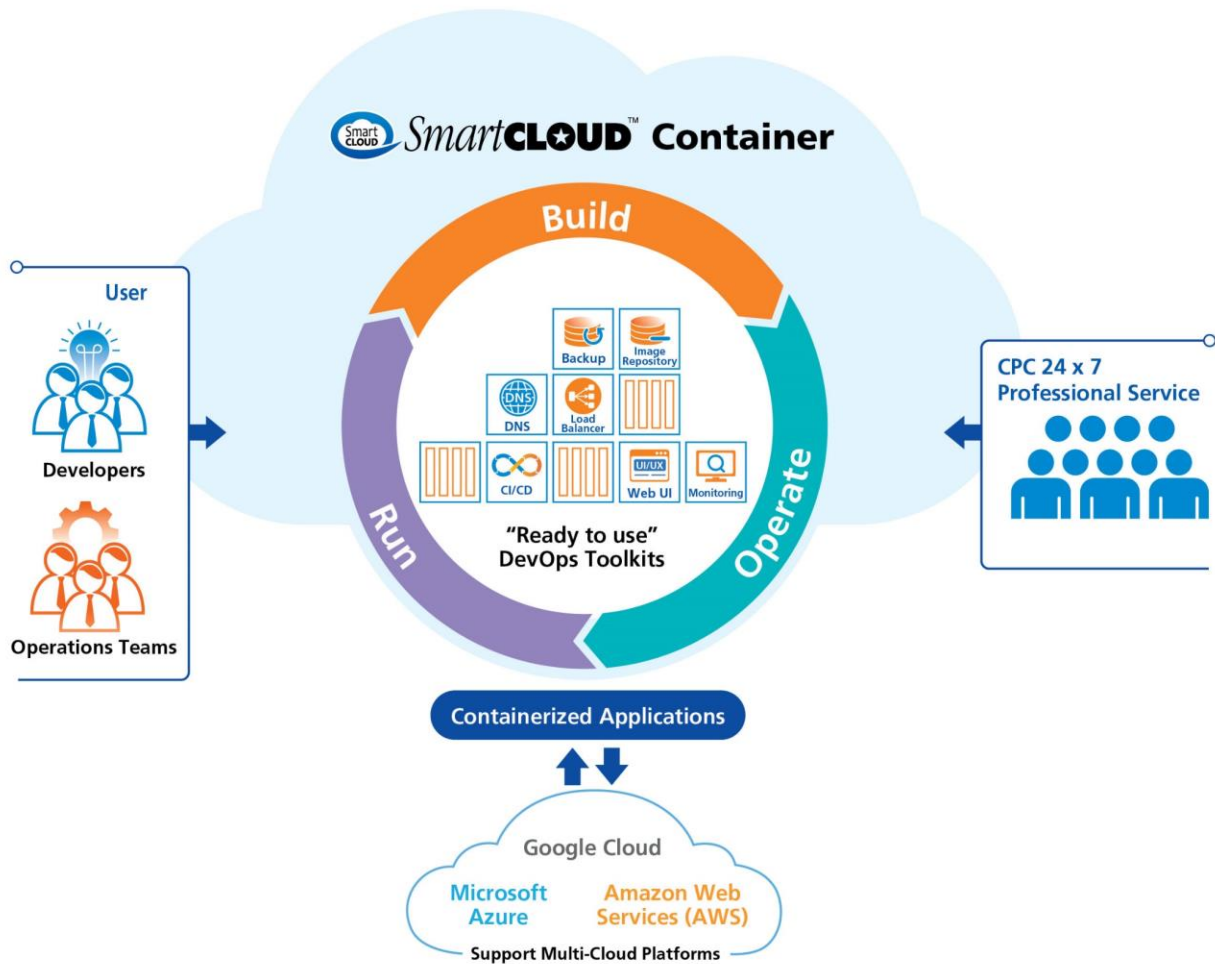

**CITIC Telecom CPC launches SmartCLOUD™ Container Service to Empower
Businesses for Application Development**
**Simplifies and Streamlines Containerized Application Workflow to Boost
Operational Efficiency**

HONG KONG, 16th May 2022 – CITIC Telecom International CPC Limited (“CITIC Telecom CPC”), a wholly-owned subsidiary of CITIC Telecom International Holdings Limited (SEHK: 1883), is pleased to introduce **SmartCLOUD™ Container Service** to simplify application workflow, streamlining operations and offering profound competitive advantages, to support new business initiatives in an unrelenting, face-paced, highly competitive environment. As a Platform-as-a-Service (PaaS), SmartCLOUD™ Container Service is a fully managed cloud-based container platform, for boosting operational efficiency and productivity. By adding the new PaaS service under the SmartCLOUD™ service portfolio, CITIC Telecom CPC is now offering a complete solution series from IaaS, PaaS to SaaS, all in managed mode for easing and saving enterprises’ manpower and time on managing their cloud infrastructures and applications.

Fast and Furious Deployment with Cloud Native Container

In today’s digitally focused world, enterprises are facing challenge of managing numerous cloud and legacy applications, as their IT staff continuously develop and refine applications to support new business initiatives to keep pace with the fast-changing environment. SmartCLOUD™ Container service allows software developers and IT departments to build, run and operate modern applications reliably, securely and at scale. SmartCLOUD Container service is built on top of Kubernetes and provides full stack of “ready-to-use” DevOps toolkits including enterprise-grade image repository, continuous integration and continuous delivery (CI/CD) services, container applications monitoring and purpose-built backup/restore solution. Businesses can exploit the advantages of the cloud-native container model to streamline and easy-to-deploy secure solution using container-based virtualization.

“To keep up with the pace of rapid technological changes in the digital world, businesses need to transform, adopt right technologies and response to changes quickly. SmartCLOUD™ Container Service is a Platform-as-a-Service. Built on industry-standard, it provides enterprises a complete managed cloud-based container platform and enables them to easily deploy different features that fit their operations, empowers businesses to enjoy a streamlined and secured containerized application workflow, and boosts operational efficiency,” said Mr. Taylor Lam, Chief Strategy Officer of CITIC Telecom CPC. “As the Global-local Digital Intelligent ICT partner, CITIC Telecom CPC’s full series of SmartCLOUD™ service portfolio can help enterprises move their digital transformation efforts further and unlock the full value of the cloud for their businesses.”

SmartCLOUD™ Container Service

Key Benefits of SmartCLOUD™ Container Service:

- Simplify & Streamline Application Development**
 By using SmartCLOUD™ Container Service, it streamlines and automates DevOps practices for modern applications and facilitate collaboration between IT operations and application development. It is even able to simplify the adoption of Kubernetes Technology, by using the open standard technology, which can easily migrate any Kubernetes-based cloud applications to SmartCLOUD Container Service.
- High-speed Large-scale Continuous Integration**
 By leveraging SmartCLOUD™ Container Service, IT teams remain productive creating and upgrading innovative applications with a dynamic container platform environment supporting their continuous integration and continuous delivery (CI/CD) pipeline. The self-service portal enables developers to deploy test environments in minutes with effortless management of large-scale application orchestration.

- **Fully Managed, High Security and Reliability**

Provides enterprise-grade security and compliance with 7 x 24 fully managed container platform monitoring and backup services to meet stringent customer requirements, not only help customer greatly reducing container platform management and day-to-day operations overhead costs, but also providing a safer and more stable container platform for modern applications

- **Smart Containerization Maintains Business Continuity**

Using multiple container clusters facilitate robust business continuity, meanwhile, it allows companies to quickly and easily clone applications into different namespaces, enabling fast failover across regions and between on-premises and cloud infrastructure to keep your business smoothly operating.
