

NeedlessCry if you are Protected against WannaCry Ransomware Attacks

On May 12, a massive outbreak of WannaCry ransomware hit tens of thousands of organizations globally.

CITIC Telecom CPC's Security Operations Centers (SOCs) have been closely monitoring and proactively identifying such attack. In the last **48 hours**, we have managed to **stop over 225,000 attack attempts** towards our managed security devices for all our customers.

As a result, CITIC Telecom CPC customers are well-protected against the massive WannaCry outbreak with **NO DATA LOSS, NO MONEY LOSS!**

Highlight Solutions
