

Uncover Abnormal Network Behavior by Managed AI Security NOW!

A well-known international airline has suffered the biggest data breach ever which passengers' personal data of 9.4 million was leaked, nearly one million of personal data was exposed. The company discovered anomalous activities on its network in March 2018 and investigations in early May confirmed that certain personal data had been accessed.

CITIC Telecom CPC's TrustCSI™ Secure AI, together with our TrustCSI™ MSS through our 24 x 7 Security Operations Centers (SOCs), can effectively detect and investigate all anomalous activities and identifies threats in advance, preventing any cyber attacks from happening!

**Your choice of being menaced or protected. Find your Trusted Security Partner!
CITIC Telecom CPC**
