

## Business Internet Solution (On-Net Tallinn)

Get your business at higher internet speed

**Across the globe business operates 24/7 and it means you need a reliable business internet connectivity. Unleash your business potential with CITIC Telecom CPC Business Internet Solution (On-Net Tallinn). Contact us to know more...**

The business landscape is changing faster than ever. This has created a need for reliable and secure internet for organization irrespective whether they are SME's, or MNC's.

According to a survey, 89% of businesses said they would prefer to switch to a new Internet service provider. In addition, every respondent admitted that poor broadband has negatively impacted their Business performance over the last two years, yet more than half (56%) have not changed the provider. The top two priorities for enterprises when choosing a broadband provider are value for money and a high-speed connection.

In the last couple of years, The Estonian government and telecom companies are investing in network infrastructure. With the increasing number of business opportunity demand for fast, reliable and flexible internet services for SME's has also increased.

Our Business Internet Solution (On-Net) with 100 Mbps internet speed and higher along with other solutions provides you secure and reliable bandwidth for all your internet and digital transformation needs.

### What is On-Net building?

It means that the building has existing connectivity infrastructure from us and you can switch to our services with ease. We have 100+ On-Net buildings in Tallinn.
