- Optimization of Resources and Cost-Effective
- Access to Corporate Network Anytime Anywhere
- Scalable
- 24 × 7 Customer Services Hotline Support
- Service Management Portal - *ManagedCONNECT*

> Global-Local Intelligent DICT Service Partner

Ensured Security

Access to corporate database is sensitive and mission critical. TrueCONNECT™ Remote adopts IPSec or SSL encryption standards, which provide tamperproof protection for information transmitted over the Internet. In addition, enterprise has absolute control of the access right of their relevant users, hence maximizing the privacy and data confidentiality.

Enhanced Manageability

Through the intuitive web-based account management interfaces, corporate administrators can keep track of and monitor individual users' access logs anytime. Authentication can also be controlled with assignments of User ID and Password as well as Security Token.

Cost Effectiveness

TrueCONNECT™ Remote is a fully managed service. It helps customers save cost on capital investment, as well as the operating costs in running and maintaining their own access gateway. Moreover, customers have the flexibility to subscribe the service according to the number of mobile users.

Robust Reliability

The access gateway of TrueCONNECT™ Remote is hosted in CITIC Telecom CPC's world-class IDC with connection to CITIC Telecom CPC's core IP network. TrueCONNECT™ Remote service is closely monitored by CITIC Telecom CPC's Network Operation Centre to guarantee service quality and availability.

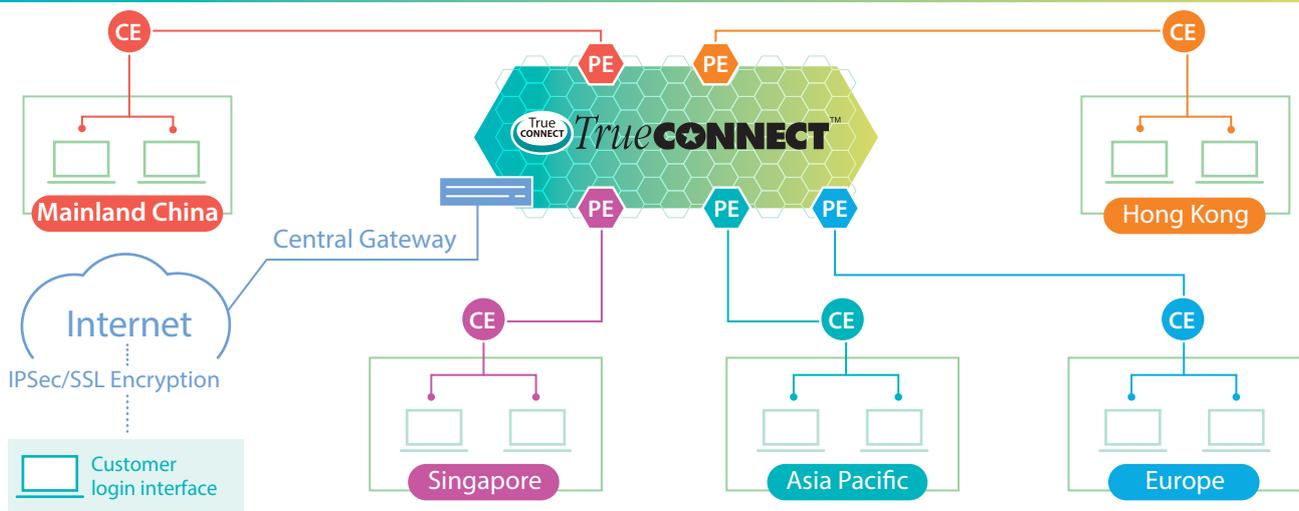

Access Anywhere by Any Means

TrueCONNECT™ Remote enables mobile workers to link up to the corporate network from any parts of the world with any means of Internet access, such as xDSL, wired and wireless technology.

24 X 7 World Class Support

CITIC Telecom CPC is committed to provide specialist support through our network monitoring system. With the combination of our experience and expertise, around-the-clock telephone and email consultation are available for customer enquiries and technical assistance.

Enhanced Identity Authentication with Security Token

ONE OF THE MOST IMPORTANT PARTS OF OUR COMMITMENT IS TO KEEP YOUR BUSINESS INFORMATION SECURE

CITIC Telecom CPC introduces a token security system to further safeguard your information as you use our TrueCONNECT™ Remote Service. With the two-factor authentication feature, users simply enter User ID and Password as normal login procedure, in addition with the 6-digit token Pass Code.

- Enterprises with mobile executives and frequent travelers
- Remote office workers
- Companies with concerns on data security through remote access
- Enterprises using TrueCONNECT™ private network service (Layer 3 VPN)
