

Cloud Email & Collaboration Suite

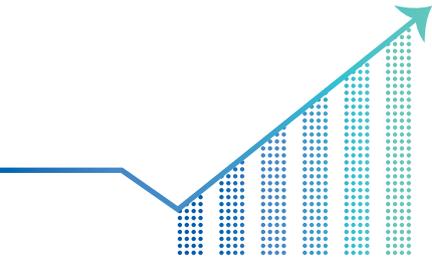

Highly Secure Mobile Collaboration Tools

CITIC Telecom CPC's **SmartCLOUD™ M@il** provides a powerful collaboration client not only easily to connect everyone, but also store and synchronize email, calendar, contacts, files and documents in the cloud. It provides a seamless compatibility with various systems and devices, including Windows, Mac and Linux OS, and the latest smartphones and mobile devices. SmartCLOUD™ M@il is a fully-hosted solution that can be rapidly deployed and requires no ongoing administration overhead. This solution provides a pragmatic tool to help and make communicating, and information sharing easier than ever.

HIGHLIGHTS

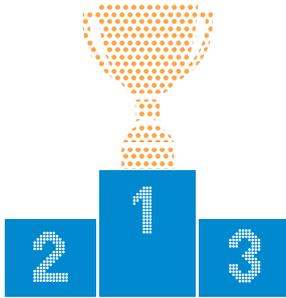

- Complete range of enterprise collaboration tools, including email, calendaring and document sharing
- Real-time synchronization of email, contacts and calendars on all major mobile devices, industry-standard protocols, and desktop operating systems

Superior Competitive Edge

You can rely on CITIC Telecom CPC for your crucial business data and applications:

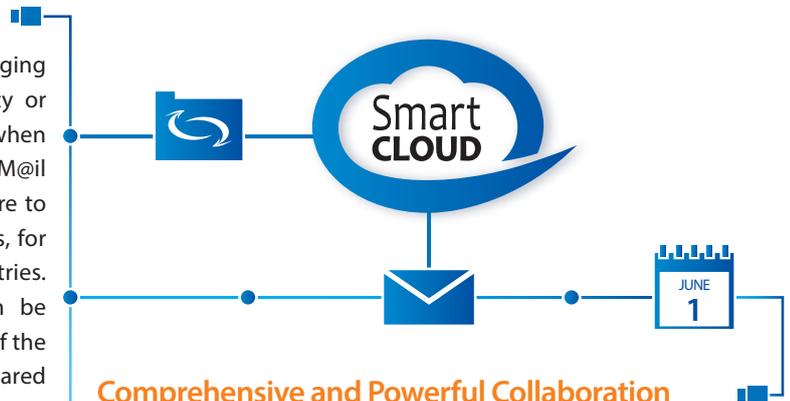

- With 2 x 10GE SAN Cloud environments
- With TRUE Disaster Recovery built on geographically-separated sites
- SmartCLOUD™ M@il data is regularly backed up onto disk and tape for added peace of mind

End-to-End Security Protects Mobile Devices and Access

Hosted on CITIC Telecom CPC's world-class cloud computing platform, SmartCLOUD™ M@il delivers 99.9% availability for reliable mobile device and Web browser access to mission-critical business tools. Unlike common Web-based email services, SmartCLOUD™ M@il is built with enterprise-grade security, ensuring users adhere to stringent IT policies to maximize end-point security. Passwords can be set for all mobile users of SmartCLOUD™ M@il. Accounts can be remotely shutdown and data can be remotely wiped on stolen or misplaced mobile devices.

Uniquely Intelligent and Integrated Solution

SmartCLOUD™ M@il easily integrates with your current messaging system to gain exceptional productivity, without complexity or high cost. While other services may become unreliable when communicating with other countries, SmartCLOUD™ M@il leverages CITIC Telecom CPC's intelligent routing infrastructure to ensure messages follow optimized paths to their destinations, for quick, reliable and intelligent delivery between two countries. Highly granular Class-of-Service and security options can be fine-tuned per mailbox or the same domain, and almost 95% of the security policies can be segregated per customer even on a shared platform. This superior control even covers parameters such as attachment size and readability, allowable number of forwarding addresses, Web UI accessibility, and more! Powerful and convenient email archiving tools further enhance enterprise resource and knowledge management, optimizing memory and offloading messages for long-term storage. For customized business needs, an open API lets your IT team easily integrate content from other locations, or simply take advantage of the many pre-built applets to instantly enhance functionality.

Comprehensive and Powerful Collaboration

SmartCLOUD™ M@il supports real-time synchronization on all major devices (including iPhone, Android, and others) and industry-standard protocols (such as IMAP, POP3 and Outlook connectivity). In addition to mobile access, the multi-platform Desktop Client also works on Windows, Mac and Linux. The powerful suite not only features with a complete range of enterprise collaboration tools including email, calendar, document sharing, but also complies with fast search function and address list.
