

新一代智能安全運作中心 Next-Gen AI Security Operations Center

AI SOC 智能安全運作中心 AI SOC

- ✓ **Enhanced Detection:**
Proactively analyzes vulnerabilities and potential IOCs to protect enterprise networks
- ✓ **Optimized Rule Sets:**
Uses AI to customize detection rules using historical data and emerging threats
- ✓ **Improved Response:**
Intelligent detection slashes troubleshooting time, delivers recommendations up to 75% faster, and issues preventive alerts to minimize business disruption
- ✓ **Intelligent Q&A Assistant:**
Get instant answers on security status and incidents through an intelligent online assistant

SIEM-MiIND 星智神盾 A self-built intelligent SIEM platform

- ✓ **Faster Data Analysis:**
Rapidly analyze massive log data with LLM to boost SOC efficiency
- ✓ **Secure Data Processing:**
All data is processed securely within our self-built, self-managed SOC
- ✓ **More Accurate Threat Detection:**
Custom "Prompt Engineering" ensures precise threat identification and response across various industries
- ✓ **Controlled Security Guardrail:**
A closed-loop defense system with validation and filtering prevents data leaks and ensures appropriate AI responses
- ✓ **Comprehensive Alert Channels:**
Real-time alerts via email, phone, AI voice, WeChat, and WhatsApp keep customers informed
