SmartTITU

SmartTITU

A One-Stop Enterprise AI Model Service Platform

100+ Leading Models | Unified API Gateway |
Enterprise-Grade Security | High Token Throughput

Ready-to-Use Enterprise AI
Orchestrate Your Entire AI Build Cycle

Five-Layer Deep Defense:
Hardening, compliance, observability, data management & remote attestation. Secure your enterprise data and privacy end-to-end.

Governance & Operations System:
Autonomous control, data isolation, RBAC and usage tracking. Mitigate risks for public & private AI models.

Cloud-Edge-End Three-Tier Architecture:
End-to-end security control from cloud to endpoint, with layered protection and incremental value.

Unified Model Gateway:
Integrate global and local leading models via one consistent code interface.

100+ Multimodal LLMs:
Text, image, video and speech support to power varied business use cases.

Elastic Online Inference:
Low-latency high-concurrency inference with on-demand token scaling.

Cloud-Edge-End Three-Tier Architecture

All-in-one Enterprise AI Platform: Orchestrate Models, Secure Data, Enable AI Agents

TITU Hub
Unified Model Aggregation and Operations Platform

Centralize AI model onboarding. End-to-end security & trustworthiness, high reliability, billing and quota controls for refined AI operations.

TITU Edge
Enterprise AI Management Platform

Manage on-premises and cloud models with cost visibility, identity access and data security for compliant enterprise AI.

TITU Work
Enterprise End-user Workspace

Centralized control third-party Agents. Let them talk directly, less back and forth. Built for your everyday work. Protect your work data, control what AI can do.

Infinite Innovation · Trusted Beyond Boundaries
